

Westchester ENT

Patient Name: _____

Please be aware that certain procedures performed in our office are not included in the standard office visit. These procedures will be billed separately and in addition to office visit charges. We have become aware that some insurance carriers are classifying these procedures as “Surgery” and applying the charges to a higher deductible amount. The result may be insurance payment for an office visit but not a procedure, or insurance payment for a procedure but not an office visit. In such cases, payment for the procedure (or the office visit) will be due from the patient. Be assured that we are following accepted billing and coding guidelines and that all procedures are performed in the best interest of patient care.

Examples of in-office procedures include:

- Flexible Laryngoscopy: This procedure involves passing a long thin flexible fiberoptic scope through the nasal cavity and into the throat. The fiberoptic scope enables the physician to visualize areas of the throat not readily seen during a standard examination.
- Nasal Endoscopy: This procedure uses the flexible or rigid scope to view areas of the nasal cavities that cannot be viewed by the physician using a standard nasal speculum.
- Nasal Endoscopy with Debridement or Biopsy: This is the same procedure as above with removal of crusting or tissue.
- Cerumen Removal: Cleaning of earwax from the ear canals.

Please speak with our office manager or medical assistant if you have any questions.
